8th UPI-UPSI THE INTERNATIONAL CONFERENCE

JOINTLY ORGANISED BY

UNIVERSITAS PENDIDIKAN INDONESIA (UPI), INDONESIA

AND

UNIVERSITI PENDIDIKAN SULTAN IDRIS (UPSI), MALAYSIA

October, 8 2018 Grand Tjokro Hotel Bandung

BACKGROUND

Preservice teachers in the 21st century are technological know how. Students in the 21st century have grown up in a fast-paced digital world, and easily tune out of the traditional lecture based classroom. Researching, communicating and even online job application across the world via computer are very common things. It means preservice teacher education for the 21st century must be directed to response the demands of this era. Prospective teachers in this age shall be provided themselves at least with knowledge of the learners, have profound pedagogical content knowledge and skills, have strong mastery of the subject matter to be taught, have sound knowledge of context of education, and have the ability to use ICT in the teaching and learning processes. Considering also the central role of teachers in providing learners in that century with both hard and soft skills adaptable to future demands, they have to be more responsive to this future demands.

In responding to this issue and trend, Universitas Pendidikan Indonesia (UPI) and Universiti Sultan Idris (UPSI) will conduct a bi-annual yearly joint international conference called as UPI-UPSI International conference. The primary objective of this international conference is to formulate some basic thoughts on the standardization of teacher education in Asia based on the multi-faceted analyses on the results of previous studies, works, and practices in the field. The conference shall share experiences on the systems and policies of teacher education and their implementation in Indonesia and other Asian countries. The sessions throughout the conference shall explore the conceptual framework on various models and designs of teacher education programs from the viewpoint of multicultural networks and collaborations among universities in Asia. In 2018, the 8th International Conference on Teacher Education shall take place in UPI, Bandung-Indonesia with its central theme “Direction And Challenges Of Education In The Industry 4.0 Era”.

The purpose of this conference is to do critical studies on teacher education and provide valuable contribution to the world of education. The sub themes are as follow :

1. Education in the industry 4.0 era
